Premier Nutrition Expands Its Voluntary Nationwide Recall of selected TWISTED and TITAN Branded Bars Containing Peanut Butter Due to Possible Health Risk

FOR IMMEDIATE RELEASE --CARLSBAD, CA, February 4, 2009 – Premier Nutrition today expanded its voluntary recall of select TWISTED and TITAN (Chocolate Peanut Butter flavor) branded bars that contain peanut butter manufactured by Peanut Corporation of America (PCA). PCA is the focus of an investigation by the U.S. Food and Drug Administration (FDA) concerning a recent *Salmonella Typhimurium* outbreak thought to be caused by tainted peanut butter. To date, *Salmonella Typhimurium* has NOT been found in ANY Premier Nutrition products; however, out of an abundance of caution, Premier Nutrition is expanding its voluntary recall in response to the recent expansion of PCA's recall of all peanut products produced in PCA's Blakely, Georgia plant since January 1, 2007.

Salmonella is an organism which can cause serious and sometimes fatal infections in young children, frail or elderly people, and others with weakened immune systems. Healthy persons infected with *Salmonella* often experience fever, diarrhea (which may be bloody), nausea, vomiting and abdominal pain. In rare circumstances, infection with *Salmonella* can result in the organism getting into the bloodstream and producing more severe illnesses such as arterial infections (i.e., infected aneurysms), endocarditis and arthritis. For more information on *Salmonella*, please visit the Centers for Disease Control and Prevention's Web site at <http://www.cdc.gov/> or call 800-CDC-INFO (800-232-4636). Consumers may also check the FDA website at <http://www.fda.gov/> for more information about the peanut-containing product recalls.
